RE: Support for Marine Fibre Optic Marine Survey

Keewaytinook Okimakanak is working with Fort Severn and Weenusk on a marine fibre optic project. I am asking for your support and consideration during the marine survey phase proposed for September – October 2023. Our community is seeking to study the route to bring long-term scalable broadband that supports critical services such as health care, education, and monitoring the health of the land, water, and wildlife.

Miigwetch,
